ELECTRICAL ENTERPRISES

BRIDGING THE ELECTRICAL INDUSTRY TO A SAFER FUTURE

COMPANY PROFILE

2024

Newbridge Electrical Enterprises

ABOUT US

Newbridge Electrical Enterprises have been in industry for two decades, committed to provide quality product and services to their Customers, earned the Trust and confidence of many prestigious companies all over the Philippines .

www.newbridge.ph

Our Mission

We aim business success by bridging quality, optimal, and latest electrical technology solutions to our valued market.

Our Vission

Work Place.

We will constantly improve work systems to provide our clients quality and timely products, our employees, work-life balance and our company, efficiency and effectiveness.

Work Partners.

We will always pursue to be a preferred and professional partner for our supplier and principal. We want to be the top choice of our customers through quality, value for money and service.

Work Force.

We will recognize individuality but we will work as a team. We will persist to improve our knowledge and expertise both as individuals and as a team in order to deliver expert and professional service to our valued market.

Work Ethics.

We will deal with utmost honesty, integrity and cooperation. We will pursue our financial goals with corporate, social and environmental responsibility.

STRONG BRAND

That provides comprehensive solutions and a wide range of products

Industrial Controls

Low Voltage Breakers

Soft Starter

Wiring Devices

Variable Frequency Drive (VFD)

Power Meter

OUR PRODUCTS

High Bay

FACADE LIGHTING

UniStrip

UniFlood light

Road light

FloodLight

Abrasives

- Handpads
- Grinding Discs
- Abrasive Sheets

Safety

- Hard Hats
- Goggles
- Earmuffs

Electrical

- Termination Kits
- Terminal Lugs
- Electrical Tapes

HENSEL

For dusty and humid environmental conditions, Hensel Quality Management System uses halogen free and silicon free thermoplastics that are “ready to use” IP 65 pre-wired switchboards, panels, feeder pillars up to 1000A made out of Polycarbonate enclosures assembled at their panel building facility in Germany & India.

NEWBRIDGE

BUCKINGHAM
BUCK
1896

**POLE CLIMBER
KIT**

Servicing the following Industries:
•Telephone •Electric •Cable •Arborist •Tower

**POSITIONING
STRAP**

**SEMI FLOAT
BODY BELT**

Became the Leader of developing products dedicated to
make the life of linemen and arborist equipment safer,
easier and more comfortable

Little Giant[®]

Ladder Systems

Introduces strongest, safest and most versatile ladders in the market:

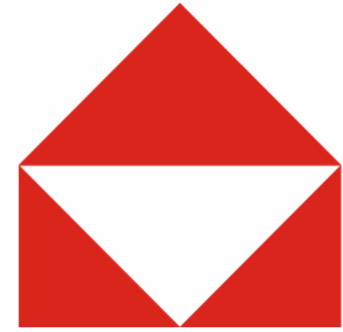

•Lightweight •Made of aerospace grade •aluminum and fiber glass•

A much faster, more efficient, and cost effective solution for the required powered lift or scaffold system.

- **Extension Ladders**
- **A-Frame Ladders**
- **Staircase Ladders**
- **90-degree ladder**
- **Trestle-and-Plank Scaffolding**
- **Leg Levelers**

A much faster, more efficient, and cost effective solution for the required powered lift or scaffold system.

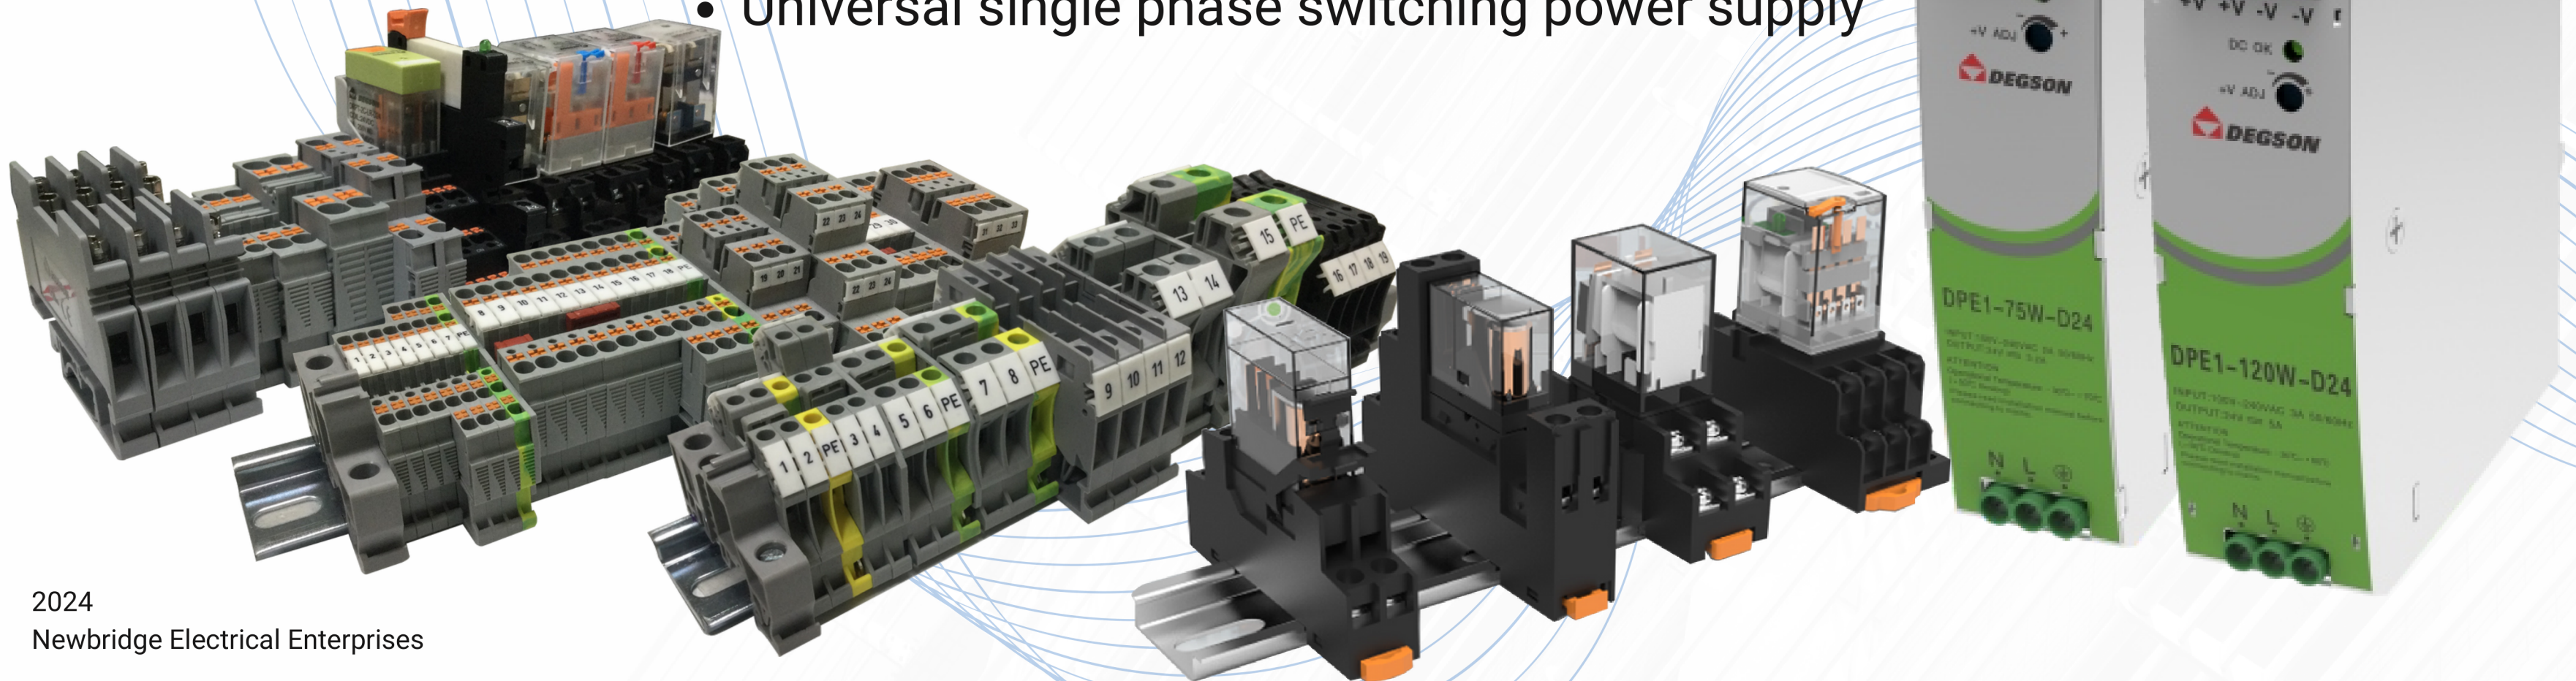

DEGSON®

Founded in 1990, Degson is one of the leading manufacturers and hi-tech enterprises of terminal blocks in industrial connection fields .

- Terminal Blocks
- Power Relay
- Relay Socket
- Universal single phase switching power supply

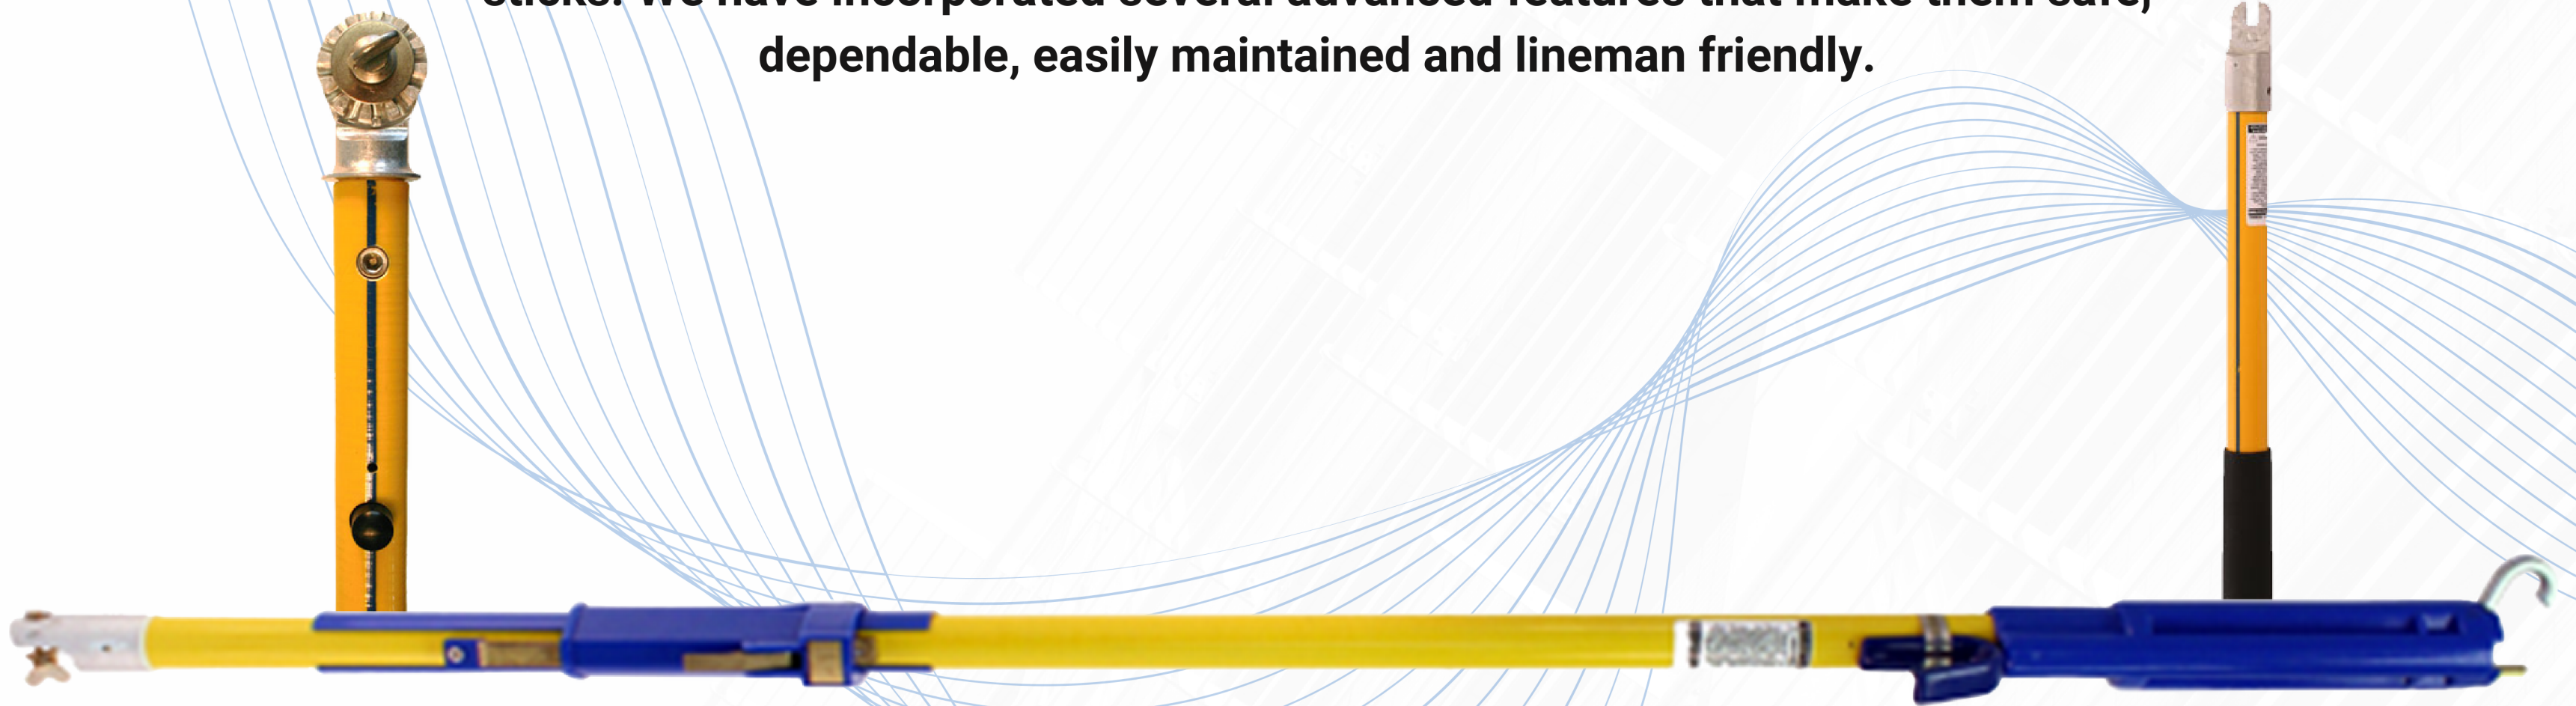

NEWBRIDGE

Fiberglass hot sticks are a lineman's best friend. They allow safe contact with energized equipment because of their insulating ability. All sticks are not created equal...

A Better Stick! The BLUE STRIPE® Fiberglass Hot Stick line is the latest evolution in sticks. We have incorporated several advanced features that make them safe, dependable, easily maintained and lineman friendly.

Support Group

Support Group that are ready for dispatch for on time delivery and ON STOCK items that are readily available for immediate replace in case needed ARE AMONG OUR TOP PRIORITY

2024

Newbridge Electrical Enterprises

STRONG ENGINEERING TEAM

NEWBRIDGE Engineering team provide electrical engineering services and support for facilities including power distribution and load planning, lighting, ventilation and networking.

Our Electrical Team's Strengths

Our team of electrical engineers and designers apply their deep knowledge of electrical codes and fundamentals coupled with their hands-on experience to design and implement cost-effective, intuitive, robust solutions for electrical challenges. From a short circuit/fault current analysis to an arc flash study, electrical gear up grades to entire industrial plant electrical power and motor control systems, we have the skill set, knowledge base, and experience to fill your electrical needs, large or small.

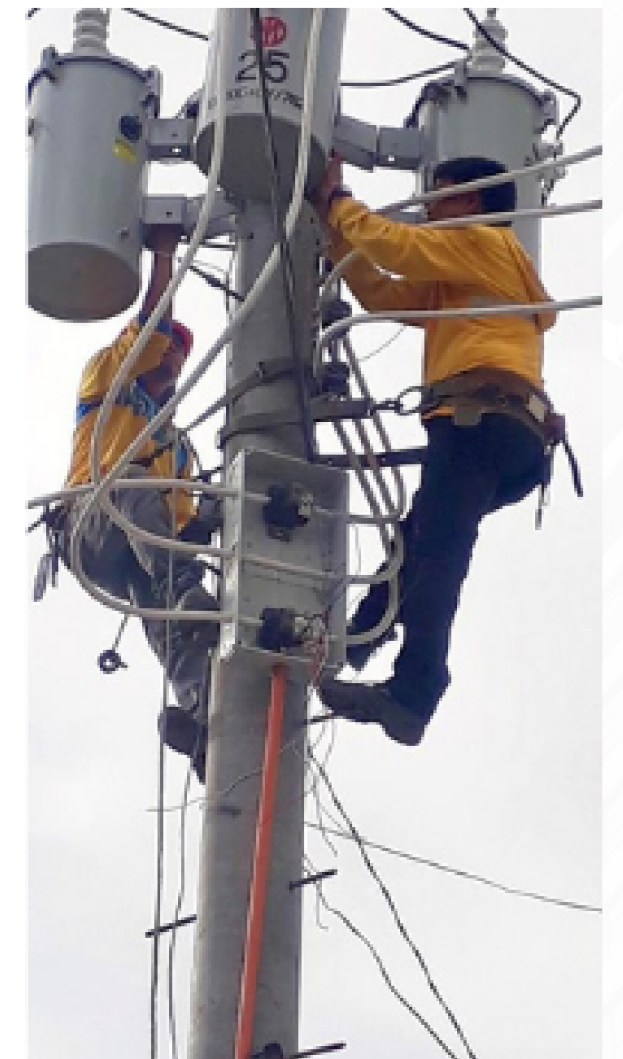

TEAMWORK

coming together is a beginning
keeping together is progress
working together is success

In order for any team to achieve its goals, every element of the team must work in unison towards accomplishing these goals. This collaborative process requires that managers and team members understand the keys to team work effectiveness. Engineering is a discipline that is entirely results-oriented and is inherently interdisciplinary. An engineering team must cooperate to meet deadlines.
